Education

Dalhousie University – Bachelor of Computer Science Oct 2024

Experience

Independent Contractor, Uber – Ottawa, ON Jan 2024 – Present

- Maintained independent contracting work while continuing software development projects and technical training.
- Completed over 8600 deliveries with a 100% average approval rating, providing timely and professional service.

Development Lead - ChemAR (Volunteer), Dalhousie Department of Chemistry – Halifax, NS Sept 2023 – Dec 2023

- Led a team of 6 developers building an augmented reality tool for visualizing 3D chemical compounds.
- Ran 1-2 week Agile sprints with planning, standups, and code reviews, and consistently met sprint goals.
- Reviewed the legacy codebase with senior developers and proposed architectural fixes for its weak points.
- Demoed the finished tool to the client and adjusted scope as requirements changed during development.

Senior Developer - ChemAR (Volunteer), Dalhousie Department of Chemistry – Halifax, NS Jan 2023 – Apr 2023

- Researched and integrated the PubChem API (PUG REST), to automate fetching and rendering of molecular data into interactive 3D structures.
- Developed an AR web app using Node.js and Three.js, allowing students real-time manipulation of 3D molecular structures on mobile devices.
- Authored over 15 user stories and mentored 3 junior developers via pair-programming.

Control Associate - Seasonal, Bell – Mississauga, ON May 2022 – Sep 2022

- Managed daily work orders for 150+ field technicians, ensuring timely service delivery and balanced workloads.
- Acted as a key liaison between technicians and management, resolving 12+ daily escalations.
- Collaborated with other control associates across departments to balance technician assignments, ensuring all service requests were staffed and workloads were evenly distributed.

Sales Representative, Cellcom – Ottawa, ON Nov 2019 – May 2020

- Surpassed monthly sales targets by an average of 15%, ranking in the top 30% of reps for 5 consecutive months.
- Recommended tailored product solutions by maintaining in-depth knowledge of offerings.
- Sold and upsold mobile plans and accessories to over 500 clients, building long-term customer relationships.
- Maintained client relationships and sales by coordinating with Mobile Business sales reps, directing business clients to the appropriate team to match competitive offers and retain revenue.

Projects

ASCII Night Sky - Wallpaper Engine | JavaScript

- Built a procedurally generated animated night sky using seeded simplex noise, published on Steam Workshop with 1,600+ subscribers.
- Kept it lightweight enough to run as a desktop wallpaper with a diff-based renderer that only updates changed cells and a frame-rate-throttled animation loop.

Skills

Programming Languages & Frameworks: JavaScript (Node.js, React), Python, Java, Rust, SQL
Web & Software Development: HTML/CSS, REST APIs, UI/UX (Figma)
Systems & Concepts: Data Structures & Algorithms, Database Management (MySQL)
Tools & Practices: Git, CI/CD, Agile, Linux
